Objective

For the development of remote villages, we provide an opportunity for the poor people to move up in the society by introducing in their life:

Means of communication

A source of light

A radio set for creating awareness

TRF Solar Projects

TRF has lit up two villages:

- **Munj Ka Pura** (Beyond Kota)
- **Beed Pinar Pura** (55 km Beyond Jaipur)

What does Sujala do?

- It provides a light for 10 to 12 hours every day
- It runs a radio and
- Charges a mobile phone

The survey...

- A survey team visited both villages to assess requirements and took photographs
- Survey was done in both villages to find out the details about the families and their livelihood.

- ... what affect it will have on the lives of each member of the family.
 - ... will the children start studying
 - ... will their earnings improve
 - ... will they suddenly become aware of the world around them and thus be a part of our country
